Application/Control Number: 09/903,831

Art Unit: 3738

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 47-62 and 421-424, drawn to a medical procedure of anastomosis from inside (endoscopically) the blood vessel (Figure 28), classified in class 623, subclass 1.11.
- II. Claims 63-166, drawn to a method of bypassing a restriction from outside of a blood vessel (Figure 8), classified in class 606, subclass 108.
- III. Claims 167-177, 190-199, 211-232, and 246-363, drawn to a graft assembly (the subcombination), classified in class 623, subclass 1.31.
- IV. Claims 178-189, 200-210, 233-245, and 363-420, drawn to a graft and assembly (combination), classified in class 623, subclass 1.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in other lumens. For example, a bypass procedure in a lymph duct or along the small intestines could be performed with the method. See MPEP § 806.05(d).

Inventions III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require the spring

Application/Control Number: 09/903,831

Art Unit: 3738

attached to the graft in that it can be separate; see claim 178. The subcombination has separate utility such as in a procedure performed by hand or in the bypass of medical tubing in a blood treatment device.

Inventions I or II and III or IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed could be used in a materially different process of use such as in process of bypassing a different lumen lymph duct or intestine segment.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was not made because of the involved nature of the restriction that the Examiner felt would be require a detailed analysis by the Applicant.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure

Application/Control Number: 09/903,831

Art Unit: 3738

outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 of 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Prebilic whose telephone number is (703) 308-2905. The examiner can normally be reached on Monday-Thursday from 6:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott, can be reached on (703) 308-2111. The fax phone number for this Technology Center is (703) 872-9301.

Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 3700 receptionist whose telephone number is (703) 308-0858.
